# HYUNDAI IONIQ ELECTRIC VEHICLE GUIDE

Things you may need to know  
for this specific vehicle

Before starting your journey in an EV please check the Charge Card operator & the type of charging cable and plan your route accordingly, ensuring you have enough range to either complete your journey or reach your next charging point.

# MAKING SURE YOUR HYUNDAI IONIQ ELECTRIC IS READY TO GO

## HYUNDAI IONIQ ELECTRIC VEHICLE GUIDE

Getting started.

Arriving at the vehicle you should see the charging cable linked to the side of the vehicle to the charge post/power point.

All of our electric vehicles have their own charging cable, which should always be safely stored inside the vehicle and out of site (i.e. in the boot) unless being used to charge the vehicle. Some charge posts have their own dedicated cable, in which case you will not need to use the one provided with the vehicle.

**The cable cannot be removed without following the next steps.**

## TO STOP CHARGING\*:

### 1. RETRIEVE THE CHARGE CARD

Open the glovebox and remove the card from the in-car PIN-pad.

### 2. ENSURE THAT THE CHARGE CONNECTOR LOCK IS NOT ENGAGED

Located on the dashboard to the right-hand side of the steering wheel, press the charger release/unlock button (as shown in images below)

### 3. REMOVE THE CHARGING CABLE FROM CHARGE CONNECTOR ON THE VEHICLE

Pull the charging cable out from the charging connector on the vehicle. Some charging cables have a release or 'trigger' button you will need to press.

### 4. REMOVE THE CHARGING CABLE FROM THE POWER POINT – (SKIP TO STEP 5 IF THE CHARGE POST HAS ITS OWN DEDICATED, PERMANENTLY ATTACHED CABLE)

Take the Charge Card and place it against the contactless card section on the charging post for at least 2 seconds (If it has one). The display screen will then indicate that you can remove the cable from both the charging point and the vehicle. Remove the cable from the charging point and return to the boot of the vehicle. \*Charging cables vary and may look slightly different.

### 5. CLOSE ALL CHARGING PORT CAPS AND COVERS ON THE VEHICLE

## IMPORTANT:

When first starting your reservation, If the vehicle has not been left on charge by the previous member please report it to the Clubhouse and ensure the charge cable is accounted for. You must detach the charging cable and close all port covers on the vehicle before driving away, keeping the keys on you at all times in case the vehicle locks. The process to place a vehicle on charge, and take a vehicle off charge can vary between charge post, each of which will have detailed instructions and a customer support number.

# SETTING OFF IN YOUR HYUNDAI IONIQ ELECTRIC

The Hyundai IONIQ Electric is operated with a keyless fob, rather than placing a key in the ignition. To lock, unlock and start the vehicle you will need the key with you. When pushing the start/stop button to turn on the vehicle, please hold the keyless fob nearby.

## 1. TO START THE VEHICLE

Simultaneously push down on the brake pedal with your right foot, and the power button to the left of the steering wheel (see image 'a') with your left hand to start the vehicle (remembering to hold the key in close proximity to the power button). Press start once to initialise, then whilst keeping your foot on brake press the power button again to start the car. The dashboard will display a message saying the car is ready to drive. Please note the vehicle is very quiet.

## 2. CHECK THAT THE READY TO DRIVE INDICATOR LIGHT ILLUMINATES

## 3. RELEASE THE PARKING BRAKE

The parking brake is located on the centre console, in between the driver and front passenger seat (see image 'c'). To release the parking brake, simply push the parking brake (P) button downwards whilst your right foot is on the brake.

## 4. DRIVING AWAY

Whilst keeping your foot firmly on the brake pedal, select either 'D' for drive or 'R' for reverse. By slowly lifting your foot off the brake pedal the vehicle will begin to move.

\*Please note, all Electric Vehicles are automatic, meaning you only use your right foot for the gas and brake pedals.

## 5. THE CENTRE AUTOMATIC GEARPAD

The gearpad for this vehicle is located on the centre console. To put the vehicle in DRIVE, simply push the 'D' button & To REVERSE, push the 'R' button. 'P' is for park, which is the mode the vehicles need to be in anytime you want to turn it off or park. 'N' is for neutral.

### IMPORTANT:

Always ensure you have enough mileage to return to a power point, if you run out of power you will be liable for all recovery fees.

# THE HYUNDAI IONIQ ELECTRIC DASHBOARD

1. POWER METER
2. DRIVE MODE
3. 'READY TO DRIVE' INDICATOR
4. ESTIMATED RANGE
5. BATTERY CHARGE INDICATOR

#### IMPORTANT:

A fully charged electric vehicle battery can range anywhere from 100-250 miles - each vehicle will display the battery charge % as well as the predicted mileage range on the dashboard.

The battery range of an electric vehicle is dependent on the vehicle, cargo and driving style. Therefore, if you are carrying multiple passengers and baggage, you will be able to travel less miles on a fully charged battery than if you were travelling alone without any baggage.

\*How far you can travel depends on the way that you drive.

# CHARGING YOUR HYUNDAI IONIQ ELECTRIC

## TO START CHARGING:

1. Ensure that you have placed the vehicle into PARK by pressing the 'P' button on the gear-pad, applied the parking brake and switched off the vehicle.
2. Unlock the vehicle's charge port covers by pressing the charge port unlock button on the right hand-side of the dashboard (see image below).
3. Connect the vehicle to the charge post using the charging cable provided with the vehicle, or if the charge post has a dedicated cable, using the dedicated cable.
4. Follow the instructions on the charge post to ensure the vehicle is placed on charge. Some charge posts have digital touch-screens with prompts that you will need to follow.

\* If you are unable to place the vehicle back on charge or in its allocated bay please contact the Clubhouse by calling 0345 266 9290.

# DRIVING EFFICIENCY IN THE HYUNDAI IONIQ ELECTRIC

Get the most from your journey

## HOW ECONOMICAL IS MY DRIVING?

THE VEHICLE'S DRIVING RANGE ALL DEPENDS UPON YOUR OWN PERSONAL DRIVING STYLE. HERE'S HOW YOU CAN INCREASE YOUR DRIVING RANGE:

1. Maintain a steady speed within the legal speed limit.
2. Flatter routes are more economical than hilly ones – even if they are slightly longer.
3. Using Less Heating and air conditioning can help contribute to a higher mileage range, however we recommend you keep to a temperature that you are comfortable with.
4. Warm-up, cool-down, and defrost the vehicle whilst it is still plugged into, and charging at a charge post - Especially on cold winter days.
5. Carrying less cargo and baggage can help get more miles from the battery charge.
6. When on charge, the vehicle will naturally start to charge slower once it has reached 80% battery charge. For this reason it is most efficient to put the vehicle on charge when it reaches lows of c.20% and take it off charge when it reaches highs of c.80%.

# HANDY TIPS FOR THE HYUNDAI IONIQ ELECTRIC

## CHARGE POST TROUBLESHOOTING

If at any point the charge post does not connect correctly or does not recognise the card, you can call the relevant number for the charge post operator to reset the charge post. Each charge post will have a customer service number along with detailed instructions on how to use that particular charge post.

If there is an issue with the charge post located at the vehicles original designated bay please contact the Clubhouse on 0345 266 9290 and inform them of this issue – they will then be able to advise on what to do with the vehicle when ending the reservation.

Contact numbers for some charge post operators are below:

EVOLT – 020 8515 8570

CHARGE YOUR CAR – 01912 650500

CHARGE PLACE SCOTLAND – 0141 648 0750

BP CHARGEMASTER – 0330 016 5126

PLEASE NOTE ALL IONIQS MUST BE CORRECTLY PUT BACK ON CHARGE WHEN YOU HAVE FINISHED YOUR JOURNEY.

## TYRE INFLATION KIT

This vehicle does not have a spare tyre. The emergency tyre puncture repair kit is supplied with the vehicle instead of a spare tyre. It can be used to temporarily repair minor tire punctures. If possible, have the vehicle towed to a facility that can repair or replace the flat tyre.

Using the emergency tyre puncture repair kit may cause a malfunction of the tyre pressure sensor and cause the low tyre pressure warning light to illuminate.

The tyre inflation kit is located in the boot where a spare wheel would normally be kept.

## WHAT IF I BREAKDOWN?

In the event of a breakdown, please ensure you have stopped the vehicle on the roadside in a safe manner before calling our 24/7 Clubhouse line on 0345 266 9290

Please note – dependant upon the circumstances you may be liable for any costs incurred.

## CONTACTING THE CLUBHOUSE

If you are unable to place the vehicle back in its allocated bay, need to extend your reservation or have any questions, you can contact the Clubhouse by calling 0345 266 9290. Alternatively, you can use the in-car PIN-pad to select these options by using the menu button.

## IMPORTANT:

Please note that the inflation kit must only be used to seal a puncture located across the central tyre tread. It will not repair sidewall tyre damage. Please contact the Clubhouse for further information if you have a puncture 0345 266 9290.
